

Bridge Method

A proven process to promise perfect collaboration and communication.

Components of Bridge Method

- **Process** to drive successful collaboration via flexible engagement models
- **Project Management Tool** to ensure Time Registration and Coding Standard
- **Team Spirit**, a result of smart Communication and fulfilment of Responsibilities
- **Performance** par excellence - a guaranteed outcome of the above three

Bridge Workshop

A thoughtful approach through which the client cooperation begins. It gives a clear understanding of each component of Bridge Method. It will help the Client and the Process Manager (PM) from Bridge to define the following:

- Rules of cooperation
- Priorities to focus on
- Performance metrics
- The rhythm of workflow
- Roles and accountability

Commencement of the Project

- Project starts with a meeting between offshore development team and onshore PO
- Discuss the project requirements, flow, and goal
- Evolve a development plan and methodology
- Finalize the Project Management Tool

Meetings & Evaluation

- Daily team stand-up to ensure effective attainment of tasks without any blockers.
- Weekly Meetings help the accountable person (client's side) and PM to assess the cooperation and identify areas of improvement if any.
- Client appraises the team in terms of key performance metrics: Communication, Analysis, Speed, Code Quality, and Testing.
- Client and PM exchange a collaboration rating to assess the cooperation.
- This weekly rating ensures superior cooperation and integrates changes if needed.
- Monthly evaluation to assess each team member.
- Sprint evaluation, detailed task planning and prioritizing for the next Sprint.
