## An Extension for Text / Image Badges

**Bridge Product Badge** is an extension to give attractive badges as a text or an image along with a product. This module has a feature to upload a text badge or an image badge for all products having more than a certain number of views. It has the option to give a tooltip message and an option to select the badge position (top left, top right, bottom left or bottom right). This module also has the option to create an image or text badge at product level, And the product level badges have the higher priority than general badges. These created badges will be displayed along with product images in category product listing, search result page, and product details page. It has the option to show the number of views of each product, and also has the feature to enable countdown for offer badges.
